André Silva

IT Support and Infrastructure Consultant

Lisbon, Portugal • +351 936 020 423 • andreatsilva@proton.me • GitHub

PROFILE

IT support and infrastructure consultant with more than six years of experience across remote and on-site support, Microsoft 365 administration, hybrid identity, endpoint management, and business networks. Currently supports client environments through Knowledge Inside, including a four-month full-time assignment at Openbook and a current assignment at JACL. Experienced in owning incidents through resolution, supporting more than 130 users, documenting procedures, and improving service delivery through practical tools such as a SharePoint-based ticketing system. Combines infrastructure experience with application development in C#, JavaScript, Node.js, React, PHP, and Python.

WORK EXPERIENCE

Dec 2025 – Present

IT Consultant, Knowledge Inside · Lisbon

- Provide remote and on-site support across client environments (including Openbook and JACL), resolving Microsoft 365, endpoint, identity and connectivity incidents end to end.
- Administer Microsoft 365 services (Entra ID, Intune, Exchange Online, SharePoint) and hybrid AD via Azure AD Connect, managing user lifecycle, access, licensing and device policies.
- Managed Openbook's 130+ user environment during a four-month on-site assignment, implementing a SharePoint-based ticketing system and closing 85+ support requests while maintaining Fortinet/Ubiquiti network and backup operations.

Nov 2024 – Nov 2025

Level 2 IT Technician, Base2 / Lenovo Partner · Lisbon

- Provided Level 1 and 2 support for Lenovo devices used by TAP pilots, resolving up to 20 hardware, OS, network and connectivity incidents per week.
- Diagnosed faults, coordinated escalations and documented interventions in a high-availability aviation environment, maintaining accurate service records and device history.

Oct 2023 – Feb 2024

Junior Developer, Javali · Lisbon

- Developed and configured a production Drupal website for a client, implementing custom functionality with PHP and JavaScript.
- Collaborated in a Git-based workflow, handling feature development, bug fixes and deployments while maintaining site stability and performance.

Nov 2019 – Oct 2022

IT Technician, Strong Answer · Lagoa

- Installed, configured, and troubleshot routers, switches, firewalls, servers, Wi-Fi, CCTV, and POS systems across client sites.
- Delivered on-site technical support and user guidance while maintaining LAN/WAN availability and resolving incidents end to end.

Sep 2018 – Dec 2018

Junior IT Technician Intern, Rostek · Darmstadt

- Built Raspberry Pi prototypes for GPIO control, a custom 3D printer controller, and smart-home automation.

Jul 2018 – Sep 2018

Junior Developer Intern, Strong Answer · Lisbon

- Built and deployed three production websites with Symfony and contributed to database design, version control, testing, and deployment.

EDUCATION

Aug 2024 – Present	**Bachelor in Computer Engineering, Autonomous University of Lisbon · Lisbon**
Jan 2016 – Sep 2019	**Information Systems Management and Programming Technician, ESPAMOL · Lagoa**

SKILLS

Microsoft Cloud	Microsoft 365 • Entra ID • Intune • Exchange Online • SharePoint
Infrastructure	Active Directory • Azure AD Connect • Windows Server • File Shares • Veeam
Networking	TCP/IP • VLANs • LAN/WAN • Wi-Fi • VPNs • Fortinet • Ubiquiti
Support	Remote and On-Site Support • Incident Management • Hardware • User Onboarding
Systems and Tools	Windows • Linux • macOS • PowerShell • Docker • Git
Programming	C# • JavaScript • PHP • Python • PowerShell • SQL • HTML • CSS
Frameworks and Runtime	.NET • Node.js • React • Symfony • Drupal
AI-Assisted Development	Secure Prompting • Code Review • Testing • Debugging • Documentation

COURSES

Sep 2026 – Present	**Microsoft Certified: Azure Fundamentals (AZ-900)**
Sep 2025 – Present	**Foundational C# with Microsoft, Microsoft**
Sep 2025 – Sep 2026	**.NET Full-Stack Foundation, Board Infinity**
Dec 2024 – Jan 2025	**Lenovo Qualified PC Service Technician, Lenovo**
Dec 2024 – Dec 2025	**Lenovo Workstation Credential, Lenovo**

ADDITIONAL TECHNICAL PRACTICE

- Built a Hyper-V homelab with Active Directory Domain Services, Windows Server, Ubuntu Server, Docker, and firewall/network segmentation labs.
- Deployed and tested services including Pi-hole, Portainer, WireGuard, Jellyfin, Grafana, Loki, Promtail, and Wazuh.
- Practised network and identity security testing with Nmap, Kerbrute, Impacket, Python automation, Hack The Box, and TryHackMe.
- Use AI-assisted development to accelerate functional application delivery while reviewing generated code, testing behaviour, validating dependencies, and applying secure coding practices before deployment.
